

## Scuba Diver – Module 3 – Version 1

**1.** The air in a diving cylinder is dried to prevent corrosion of the inside of the cylinder. As a consequence:

- a) You should take precautions to be well hydrated (drink enough water) before diving.
- b) It will be very hard to breathe the air from the cylinder.
- c) Your regulator will make a strange sound every time you inhale.
- d) None of the above.

**2.** Why do Scuba Divers need an introduction to any environment different from the conditions in which the course has been conducted?

- a) Because a Scuba Diver course can only prepare you for dive conditions that you experience during the course.
- b) Because the Scuba Diver course is not a good training program.
- c) Scuba Divers do not need such an introduction because the course prepares you for going underwater and that is what you do on all dive sites.
- d) None of the above.

**3.** Underwater objects appear closer than they really are. In reality they are about \_\_\_\_ further away than where you see them.

- a) Two times
- b) Three times
- c) 25%
- d) 50%

**4.** Sound travels faster underwater than on land. As a consequence:

- a) You can hear a lot better underwater.
- b) Sounds are a lot louder than on land.
- c) Your ability to hear where a sound is coming from is impaired.
- d) None of the above.

**5.** How should a diver move underwater to avoid overexertion (check all correct answers)?

- a) Slowly.
- b) Hydrodynamic.
- c) Fast.
- d) With more weights than needed to make sure that it is easy to stay down.

**6.** When you end up in a strong local current, do not try to swim against it, but try to get out of the zone by swimming in a 90° angle with respect to the direction of the current.

- a) True
- b) False

**7.** Diving with a buddy (check all correct answers):

- a) Is necessary because all emergency procedures learned in the course are based on the presence of a buddy.
- b) Is practical for suiting up and for entering and exiting the water.
- c) Is more fun because you enjoy and experience the dive together.
- d) None of the above.

**8.** What is the meaning of this hand signal?

- a) Okay.
- b) Not okay.
- c) Stay here.
- d) Hold hands.

**9.** Underwater you have to communicate with your buddy. You can write short messages on a plastic slate with a normal pencil.

- a) True
- b) False

**10.** A dive suit keeps you warm for any length of time.

- a) True
- b) False
